

James Irei

Chief Technology Officer specializing in cross-platform XR application development

Hilo, HI

jjirei.dev@gmail.com

+1 720 343 9436

Professional Summary

Enthusiastic CTO with a background in applications development and the mixed reality space. Developed mixed reality applications and developer toolkits for Store 8, the R&D wing of Walmart. At Artificial, designed architecture and oversaw development of a life science laboratory mixed reality application. Excited to continue driving technological innovation in mixed reality with XR Solutions.

Authorized to work in the US for any employer

Work Experience

Chief Technology Officer

XR Solutions-Austin, TX

August 2022 to Present

- Software company developing enterprise XR software for DoD and Government entities
- Coordinated with other C-Suite executives to conduct high-level product management concerning timelines, project scopes, budgeting, marketing, and sales
- Served as project lead and solution architect for new, existing, and potential future endeavors
- Lead interdisciplinary development team of engineers, technical artists, and designers to deliver projects within delivery estimates
- Reduced friction of engineering and design when communicating complicated concepts and ideas
- Met with clients and potential business partners to discuss opportunities and project proposals

Senior XR Developer

Artificial, Inc.-Palo Alto, CA

May 2021 to July 2022

- Software company developing laboratory automation software
- Interdepartmental collaboration with globally distributed team members
- Independent MR/AR research and development for lab automation platform, primarily on Microsoft HoloLens 2
- Regular contributions to the front end team, creating and maintaining the web-based Vue application

Senior Software Developer

Project Archer-Seattle, WA

April 2020 to May 2021

- Worked as an MR/AR developer making applications primarily for Microsoft HoloLens 2, NReal, and Magic Leap One
- Duties include creating and maintaining mixed reality design tools to help increase productivity and ease of prototyping for the design team
- Worked to develop reusable packages that could be distributed amongst the teams for usage in the main project, auxiliary systems, or prototypes

- Gained insight into utilizing the core functionality of mixed reality headsets, such as spatial mapping, shared anchors, and sharing experiences in real time

Lead Unity Developer

XR Solutions-Austin, TX

March 2019 to April 2020

- Created custom software on cutting edge Mixed Reality platforms, such as the Magic Leap One, with little guidance and sparse documentation
- Ported software to mobile platforms to run on either wearable or generic Android and iOS devices
- Responsible for creating and maintaining scalable, cross-platform codebase to be shared across multiple platforms

Unity Software Engineer

Humulo Engineering LLC-Annapolis, MD

August 2018 to March 2019

- Worked as a software engineer for Humulo Engineering LLC creating educational applications for Department of Interior

Junior UI/UX Developer

Rossch Group LLC-Houston, TX

April 2016 to August 2018

- Worked as a junior frontend developer for Rossch Group LLC, an aviation solutions company.

Mobile Developer Intern

WellBee LLC-Washington, DC

August 2015 to June 2016

- Interned as a Junior Mobile Developer for WellBee LLC, a health and mindfulness solutions company

Education

Bachelor's degree in Game Design

George Mason University - Fairfax, VA

August 2007 to May 2014
